PRESENTATION

The future of education depends, as a matter of priority, on those who have opportunely invested their best energies in researching and setting up structures and mechanisms for creating the education of the future. Aware of this historical responsibility and convinced that the real issues of education are at the level of law, the Order of The Pious Schools and the Association BLAS in Africa have created the Calasanz Institute of the Right to Education (ICALDE). Established by decree of the Superior General of the Order of the Pious Schools No Prot.S.198.2016 of September 15, 2016, ICALDE's main mission is to train high-level executives in the field of the right to education for all.

The originality of ICALDE lies in its ability to combine the strengths of Leadership, Lobbying and Advocacy to train people who can effectively contribute to the development, implementation and monitoring of public policies on educational issues. ICALDE is an original and ambitious response to the current challenges of inclusive education for all.
